DESCRIPTION AND DISCUSSION OF CHANGES		
Area of Change	Description	Discussion
5		

This report details the technical changes, between revision levels, for the listed document. The report does not take into effect specific plant configuration and is only intended as a tool for evaluating plant impact.
 Proprietary Information: This product is licensed to a plant/utility for use in their document review and approval process, as indicated in their contract with Vendor Information Solutions (VIS). It is not to be resold or copied for use at additional plants or utilities without express written consent by VIS.
